

Location: Commercial Property Sectors – UK Wide
Value: 2 Million +
Start Date: January 2008
Completion: Ongoing

Facts:

Asbestos containing materials (ACM) are common in all properties built prior to 1980, particularly those from the period 1950-1975. In recent years, there has been an increase in legislation requiring commercial landlords to ensure the protection of building occupants from deleterious materials, including asbestos.

We have undertaken large-scale surveys of commercial property portfolios for many owners and managing agents including:

- British Land Company
- Derwent London
- DTZ
- CBRE
- Hillier Parker
- F&C REIT
- Land Securities

The services we provide are often used by surveyors, architects and other building professionals, as well as management contractors and construction managers. As project managers, we have also completed many asbestos removal projects with values up to £1 million.
