

Location: Farrer & Co, Holborn
Value: £475,000
Start Date: October 2008
Completion: December 2008

Project Information

Following the investigation stage which included heavy metals, water, asbestos, paint, oils, acids (tanks), drains, concrete and brick assessments.

PA Group tendered the required refurbishment of a listed 18th Century property via a specification and procured the project on behalf of the client Farrer & Co, the project was delivered in an eight week programme which was achieved by working during and out of hours.

To ensure all elements of the refurbishment run smoothly we worked closely with the Project Manager of Farrer & Co Trevor Cox and had a weekly meeting to confirm that we were on schedule at all times.

The project was completed on time and on budget and due to a clear understanding of Farrer & Co and their objectives for the project, we are continuing to work on other projects.
