

Location: Focus DIY West Wickham
Value: £220,000
Start Date: Sept 2008
Completion: Sept 2008

Project Information

We currently assess and manage the asbestos for Focus DIY, and as part of an on going contract we carry out asbestos survey's, re-inspection's and all necessary remedial works within all stores across the UK.

Following an emergency call out in August 2008 where we were asked to sample and analyse a suspected asbestos material., in which we attended immediately, we identified a highly dangerous type of asbestos and deemed the store unsafe for occupation.

We acted immediately and arranged for 12 operatives to work long shifts to carry out a pre-clean to all stock and de-cant the store including all racking & shelving
We then proceeded to take down and dispose of the current suspended contaminated ceiling and carry out the removal of the AIB Boarding.
