## London Borough of Hounslow

Client	London Borough of Hounslow
Location	London
Project Description	Asbestos Removal Framework
Value	£300,000.00
Start / Finish Date	May 2016 - May 2018

## Project Description

PA Group was awarded a framework contract for Asbestos Removal, the framework incorporating asbestos services in the form of removal operations to residential properties throughout Hounslow.

The project heavily depends on our ability to liaise with the tenants and clients to ensure economical roll out of the inspections and any dissemination of information to the other frameworks partners.

The asbestos remediation provides services for the voids team, planned/reactive maintenance and capital projects. This means servicing both fast turnaround void projects, liaising with tenants for occupied properties and dealing with third party contractors and Hounslow's projects teams on large scale removal works. We are the single source supplier and nominated asbestos removal contractor for the council in all areas.

“ I have during their contract with LBH found them extremely responsive to our requests (all of which seem urgent to us).

In a recent example, they even managed to arrange to have some staff available for an urgent short notice project, between Christmas and New Year.

Chris Rutter, Capital Programme Manager
